EDUCATION

Bachelor of Science, Computer Science, 4th year *@ University of British Columbia* *Expected grad 2028*

EXPERIENCE

Software Developer Coop *@ ScalePad* *C#, TypeScript, React, Go* *Jun 2026 – Present*

- Contributed to a full-stack revamp of Lifecycle Manager (UI + public controller), a B2B client management platform for MSPs, working in a **3M-line codebase** alongside a **12-person engineering team**.
- Designed an **E2E test harness** covering a Go desktop agent and Python upload pipeline, catching regressions before updates shipped to **130K+ installed devices**.
- Got release validation passing in CI for the first time: AWS-based (Step Functions, EKS, Terraform), **4 macOS/Windows VMs**, approximately **200 checks** gating every production release.

Vice-President Engineering *@ UBC UX Hub* *Supabase, Next.js* Website & Portal *Sep 2025 – Present*

- Lead a 6-person engineering team building and maintaining a full-stack event and membership portal for UBC's design community, drawing **200+ monthly visits**.
- Run weekly engineering meetings and co-working sessions, bridging the design and dev teams and creating a space for student developers to learn from each other.

Developer *@ Customer Maps* *Google Cloud, ADK, FastAPI, FastMCP* *Jan – April 2026*

- Built and deployed MCP servers (Shopify, Google Analytics, Google Drive) and two Shopify React Router apps (including a Preact theme app extension), powering a multi-agent system on Google ADK.
- Architected a production grade Next.js e-commerce chat application with real-time SSE streaming, Zustand multi-session state, and Clerk authentication, integrating automatic BigQuery dataset provisioning via signed webhooks.

TECHNICAL PROJECTS

Pepper Apply *Vite-React, Fastify, TipTap, Prisma, Clerk, AWS Lambda* Visit the app *Aug – Present*

- Built a block-based document editor in **TipTap/ProseMirror with custom nodes** and a constrained layout system, giving any LaTeX document a WYSIWYG editing experience that mirrors its compiled PDF layout.
- Built a LaTeX AST templating engine and a **Dockerized TeX Live compiler on AWS Lambda**, compiling structured editor content into typeset PDFs on demand.
- Architected an end-to-end **type-safe pnpm monorepo** (tRPC + Zod + shared schemas) spanning a Vite/React frontend and Fastify backend, so API contract changes surface at compile time.

wisk - Japanese Learning App *Pipecat, SQLite, FastAPI, Next.js* Devpost *Jan – Feb 2026*

- Led 5 developers and 2 designers to ship a production-ready MVP for the Gemini Hackathon in 3 weeks, running scrums, PR reviews, and CI/CD on Vercel and Railway.
- Architected a real-time **AI live-chat on Pipecat and Daily WebRTC**, with custom agent tool-calling that detects and validates target vocabulary as the user speaks.

Access Buddy Chrome Extension *React, Express, Flask* Winner of nwHacks 2025 Demo *Jan 2025*

- Won the **Potential Community Impact Award** at nwHacks 2025 for creating an accessibility focused Chrome extension that allows users with physical impairments to navigate the web using only their voice.
- Achieved 85% command-execution accuracy by combining Vosk for speech recognition, OpenAI API for natural-language command processing, and PyAutoGUI for desktop automation.

TECHNICAL SKILLS

- Languages: HTML/CSS, Java, Python, C/C++, C#, SQL, TypeScript, Bash
- Frameworks & Tools: Node.js, FastAPI, React, Next.js, Git, Docker, AWS, gcloud, Figma, JUnit, Mocha, Chai
